

BIOTECHNOLOGY COMPANY IS SEEKING A QC

MANAGER

A cell therapy biotech company located in the Weizmann Science Park in Nes Ziona is seeking a QC Expert to manage the QC department.

Candidates need a strong industry QC background (GMP is an advantage), with suitable experience and knowledge of assay platforms for cell therapies, have good orientation in regulatory guidelines (e.g. EMA, FDA) needed for cell therapy assays. To be responsible for the leadership and/or scientific oversight of QC projects ensuring effective integration across disciplines and efficient delivery of project objectives.

The Quality Control manager will be responsible for analytical method development, methods validations, bank stabilities, batch and product analysis, lot to lot assays of incoming materials as well as QC assessment of GMP (clean room) operations (e.g. environmental monitoring etc). The QC manager in coordination with production, R&D, regulatory and QA departments will be responsible to outline and perform the programs defined by the company's strategy.

Knowledge and expertise in cell-based therapies that includes the following test methodologies: Cell characterization using Flow Cytometry, cell count, ICF ELISA LAL, Sterility Mycoplasma (Safety).
